

1, configure client

In the root directory

```
$ cd client
```

```
$ npm i
```

2, configure server.

In the root directory

```
$ cd server
```

```
$ npm i
```

3. run the program

In the root directory: start server and clien separately

```
$ npm run dev:server
```

```
$ npm run dev:client
```

4, if you want to use the automation test, directly in the root directory

```
$ npm i
```

```
$ cd Automate_testing
```

```
$ npx cypress open
```

Remember to start the program before starting the automated test which is to complete the 3 !
