1, configure client

In the root directory

$ cd client

$ npm i

2, configure server.

In the root directory$ cd server

$ npm i

3. run the program

In the root directory: start server and clien separately

$ npm run dev:server

$ npm run dev:client

4, if you want to use the automation test, directly in the root directory

$ npm i

$ cd Automate_testing

$ npx cypress open

Remember to start the program before starting the automated test which is to complete the 3 !
